-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 12, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis, Fritz et al. and Espey et al.

The Lewis reference (Fig. 4) discloses an overflow assembly comprising: an overflow pipe 19 including a flange 48, a sleeve (receiving 43); a hollow fitting 41 having an inner end 43 and a

Art Unit: 3751

threaded outer end 42; and a nut 21. Therefore, Lewis teaches all claimed elements except for the provision of a cap.

Although the hollow fitting of the Lewis overflow assembly does not include a cap, as claimed, attention is directed to the Fritz et al. (Fritz) reference which discloses an analogous overflow assembly which further includes a hollow fitting 30 having a cap 18. Therefore, in consideration of Fritz, it would have been obvious to one of ordinary skill in the overflow assembly art to associate a cap with the Lewis hollow fitting in order to conceal the assembly. Furthermore, Fritz teaches use of lugs 64 to frictionally detachably engage the cap with the hollow fitting (via 14,32). Additionally, the Espey et al. (Espey) reference teaches providing a nut 20 with lugs 21-26 to engage a cap 40. It would have been obvious in light of the combined teachings of Lewis, Fritz and Espey to engage the cap taught Fritz with a nut having lugs as taught by Lewis and Espey in order to provide the benefit of the cap as disclosed by Fritz with an overflow assembly of the type having a nut with lugs. Re claim 15, the cap disclosed by Fritz includes a six o'clock notch 54.

3. Applicant's remarks at page 4 of the response filed September 22, 2005 have been fully considered but are not deemed

Art Unit: 3751

persuasive as failing to address the actual prior art grounds of rejection.

4. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.

5. The grounds of rejection have been reconsidered in light of applicant's arguments, but are still deemed to be proper.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
